

# Kandoolu

"Kandoolu makes it easier to differentiate instruction and boosts engagement by letting students take ownership of their learning goals and the path to get there."

–Fifth grade teacher,  
Wilkinsburg School District

## Your New Learning Navigator

Kandoolu is a K-12 personalized learning solution that gives teachers a real-time snapshot of student learning with follow-up activities that are tailored to the needs of each student. This fun and easy to use app works on all devices typically used in schools today.

"Kandoolu rocks!"

–Fourth Grade Student,  
Kiski Area School District

### Rigorous Content

All standards-aligned assessment questions and supporting resources are vetted by expert educators to provide high quality instruction that challenges students and measures true understanding of content.

### Real-Time Results

No late night grading crunch to check for understanding. Kandoolu does it for you. Know within seconds which students understood your lesson and who needs more help.

### Motivate and Inspire

Keep their attention by using mobile devices to engage your students in ways that make them want to explore and learn. Let your students have a greater voice in their path to success.

Recent studies have shown a direct link between the use of personalized classroom instruction and significant gains in student performance. The Kandoolu™ Learning Navigator is a major breakthrough in OnHand Schools' vision for delivering personalized learning. It builds on the success of EdInsight and offers schools a powerful platform to push student achievement to new heights.

### **The Kandoolu Learning Navigator enables teachers to:**

- Assemble quick, standards-based "check-for understanding" quizzes in five minutes or less from a bank of questions written by expert educators.
- Administer assessments in the classroom or as self-guided assignments, over any web-based device including iPads, Chromebooks, and mobile phones.
- Monitor student responses in real time and stop/adjust the pace of the lesson to address common misconceptions.
- Immediately receive suggested resources (videos, games, apps and websites) from a carefully vetted library created by fellow teachers that reinforce the skills being taught.
- Push personalized assignments to students with resources that they would find particularly helpful based on their performance.
- Motivate students by awarding trophies to users in categories that include sustained, active learner participation and completion of target exercises.
